

EYFS - Where does snow go?

At Whiston Willis Primary Academy, we ensure that Global Learning takes place from our pupils' earliest days in school. In January and February, our youngest children in EYFS began to explore SDGs 6 (Clean water and sanitation), 13 (Climate Action) and 14 (Life below water) as part of their "Where does snow go?" topic. They considered how to care for living creatures and their habitats both near to home and far away. Parents and carers were informed and involved through a class newsletter and an "every little helps" challenge.
